Join us when the
students compete in
green technology

AT DTU WE WORK FOCUSED
WITH **SUSTAINABILITY,**
THE ENVIRONMENT AND
CLIMATE TECHNOLOGY
IN ALL OUR STUDY
PROGRAMMES.

IN THIS FOLDER WE
PRESENT TWO INITIATIVES
- **GRØN DYST** AND **GRØN**
KARRIERE - WHERE
YOUR COMPANY,
TOGETHER WITH DTU,
HAS THE POSSIBILITY TO
MAKE A DIFFERENCE.

GRØN DYST

Every year the work with green and sustainable initiatives in the teaching at DTU culminates with a big student conference called GRØN DYST (Green Challenge). At the conference, all DTU students have the possibility to present their visionary projects focusing on sustainability, the environment and climate technology to the public, and compete for prizes. Read more at www.groendyst.dtu.dk
Your company can participate in GRØN DYST in different ways

1 **GRØN DYST-company prizes**

DTU awards prizes worth more than 200.000 DKK to the best projects within different categories. It is possible for companies to offer special prizes to the students – e.g. cash prizes, consultant hours or electronic equipment for ongoing student projects.

2 **Project contribution**

Your company has the option to collaborate with DTU students on projects which focus on sustainability, the environment and climate technology, that can be presented at GRØN DYST student conference. The collaboration can continue and be further developed after the conference.

3 **Judging panels**

You can also become a judge at the GRØN DYST Student Conference. The judging panels consist of representatives from the business world, the political world, students and professors. As a judge you will have close contact with the students and get/have opportunities for networking and getting new inspiration.

"It was very positive to see the enterprise and innovation, which the students showed - not to mention their enthusiasm at the presentations. We'd love to continue to participate in the event - and would especially like to continue the dialogue with the students"

Palle Weidlich, Business Consultant,
Væksthus Copenhagen

GRØN Karriere

At GRØN Karriere (Green Career) your company has the opportunity to brand itself as an attractive option for students who wish to work with sustainable projects. The event takes place at DTU Meeting Centre, where each participating company gets their own room in which to do a 30 minutes presentation about a specific green project and the demands the projects put on the employees' competences. The students have time to listen to three different company presentations after which there's time for networking and talk with the companies.

"IBM participated in Grøn Karriere with a presentation on Smarter City Challenge. It was great to have the students in small groups and it gave way for interesting questions and discussions during and after the presentation. We are looking forward to participating again next year"

Peter Lange, Executive IT-Architect, Nordic Technical
Sales Leader - Industry Solutions, **IBM**
